

What's New

# New release

## v.1.16

What's New

# Drone Forensics support

Ingesting, parsing, and analyzing:

- ArduPilot DIY Drone
- DJI Agras MF-1S
- DJI Matrice
- DJI Mavic
- DJI Phantom 3
- DJI Phantom 4
- DJI Spark
- Parrot Anafi
- Yuneec Typhoon Q500

You can also analyze compatible drone models.

What's New

# Mobile Forensics

## Agent-based iOS acquisition

The agent-based full file system acquisition is updated to support iOS v.15.2 to v.15.3.1, so that the entire range of supported iOS versions is 10.3.3 to 14.3 and 15.0 to 15.3.1

What's New

# Mobile Forensics

Decryption of the latest versions of Xiaomi's MIUI backups is supported

- Decrypt backups, even if they are protected with two-factor authentication
- Decrypt any single BAK archive file from within the backup even without the backup manifest file

What's New

# Mobile Forensics

Decryption of the latest versions of Huawei's HiSuite backups is supported

- HiSuite versions 10-11 supported for Windows
- HiSuite versions 11-12 supported for macOS

What's New

# Media Forensics

AVC video format supported:

- search
- analysis
- keyframe extraction

This feature is particularly important for drone analysis, as many drones utilize the AVC format

What's New

# Sigma rules support

Sigma rules are a standardized way to define detection logic for security events.

They can be used in cyber incident response to automate detection and response workflows across multiple security tools and platforms.

With the new version of Belkasoft X, users can browse and detect matches for Sigma rules within found event logs.

What's New

# Enhanced Automation

- **Configurator tool**

Instead of editing complicated JSON options file manually, you can tune your workflow easily with a convenient user interface

- **Better JSON mistakes handling**

If you decide to manually fix your options file and make a mistake, the product will better diagnose the error

- **We added more report formats to the command line interface**

*To remind, unlike the competition, who sell automation features as a standalone product, Belkasoft offers automation free and seamlessly integrated into Belkasoft X!*

What's New

# Other improvements

A batch of updates was made in

- Cloud Forensics
- Date and time filters
- PDF reports
- And more
